## Improvement Factory Joins Elite Ranks of Certified AVEVA Partners

Patryk Gauza · Tuesday, July 23rd, 2024

Improvement Factory has been honored with the title of Certified AVEVA Partner in the fields of MES Operations, MES Performance, System Platform, and InTouch. This achievement is unique on a global scale, as ImFactory distinguishes itself as the first and only company in Poland to receive certificates acknowledging expertise in both MES Operations and MES Performance integration. By joining this elite group, Improvement Factory became one of twelve companies worldwide to receive MES Operations certification and one of four to receive MES Performance certification.

*“The obtained certificate not only acknowledges our competences but also allows us to better understand the operations of implementation companies with whom we cooperate as an MES competence center. Having advanced capabilities in MES integration enables us to provide top-quality services and support our clients in the digital transformation of production,” states Grzegorz Purzycki, CEO of ImFactory. He adds, “Increasingly often, especially in international projects, we notice that end users demand comprehensive management of digital transformation projects, from a Roadmap, through strategy and development, to system integration. Therefore, this certificate paves the path for us to engage even more actively in international activities.”*

To receive the AVEVA certificate, integrator company employees must pass demanding exams and present the required credentials with implemented software for which the company is seeking certification. In the case of Improvement Factory, over ten employees participated in the exams and the company presented eight implementation credentials – two for each product in the field of MES Operations, MES Performance, System Platform, and InTouch.
